■ The RideInn™ Storage System

Regardless of the weather, or storage conditions inside or out, RideInn™ provides superior personal transportation and property protection. Protects your belongings from dings, dents and dust.

You don't have to wait for engines or hot pipes to cool down prior to covering them. The side vented canopy easily slides and lifts to the desired closed position of your choice.

RideInn™ is the solution for a variety of storage applications. Protect your investment today.

Store & Protect Conveniently

- Motorcycles/ATVs
- Mountain Bikes
- Lawn Mower/Tractors
- Snow Blowers
- Outdoor Furniture
- Garden Equipment
- Scooters

HEAVY-DUTY WEATHERPROOF STORAGE

How it works

Ridelnn™ Storage Shelter System provides superior protection. No tie-down straps required. Motorcycles or other wheeled vehicles can be easily stored without waiting for the motor or exhaust pipes to cool.

The **Ridelnn™** is designed to fully close from 6' 10" all the way to 10' 10". Only use space you need by simply sliding the canopy to your desired position.

Many of our customers use the **Ridelnn™** inside their garages. They have also been installed under car ports, on gravel and patio blocks. A dry, level area is always preferred. Ample mounting holes easily secure the canopy to a frame or pavement.

To assemble you only need an adjustable wrench and some pliers.

Easily store larger bikes with tall windshields

Store ATVs up to 46 inches wide

It's so easy

STEP ONE

A fully retracted **Ridelnn™** is only 18"

STEP TWO

Next, simply slide the canopy forward

STEP THREE

Continue sliding the canopy to the desired length: 6' 10" to 10' 10"

STEP FOUR

Finally, close the canopy and lock if desired

Features & Benefits

- The 100 lb, 0.060" rugged steel frame protects stored items from accidental side impact.
- Our cover features a UV resistant, nylon outer layer with PVC waterproof underlining.
- All seams are reinforced with double stitching for durability and flexibility.
- Side air flow vents reduce condensation.
- Do-it-yourself...easily assembles in under an hour with less than 18 nuts & bolts to tighten.
- Top canopy snaps into place.
- Designed to take 50lbs of structural load between canopy supports.
- Easy mounting tabs.
